BIG NEWS FOR GARDEN FOLKS

BOXWOOD BREVITIES

Here's the
CONWELL BOXWOOD GARDENS
in Milton, Delaware

The Largest Collection of Fine Boxwood In America

Every Conceivable Size and Shape, the Highest Standard of Quality Always Maintained

H. ERNEST CONWELL

I N C O R P O R A T E D

BOXWOOD NURSERIES

MILTON, DELAWARE

To those who love Old English Boxwood:

To the man or woman who has stepped out on a veranda after a rain and has caught that delicate, indescribable fragrance of Old English Boxwood--to those who have seen how perfectly this charming old shrub adapts itself to any setting--the following news will be of particular interest.

Despite the rising prices of almost everything, we are offering this beautiful Boxwood at more attractive prices than ever for the coming planting season.

Every formation and all sizes of this rare shrub are among this wonderful collection--hedges, matched pairs, foundation plantings, beautiful shaped specimen--all of healthy, heavy, luxuriant foliage.

A great many types are illustrated here. Select the particular type which is suitable for your garden and write giving us the size and shape you wish. You will find our prices surprisingly reasonable, besides, you know, we guarantee all our Boxwood to live and thrive.

We extend to you a cordial invitation to visit the Nursery--to see the largest collection of fine Boxwood in America. By motor--south from Wilmington over the famous duPont Boulevard, through one of the oldest and most interesting sections of Colonial America.

H. ERNEST CONWELL, Inc.

In any setting -- for any effect,
BOXWOOD LENDS AN ADDED CHARM.

We have about 50, the sizes from 4 to 10 ft. high with the same spread. Nursery grown Hollies 3 to 5 ft. high, 1 ½ to 2 ft. spread.

WRITE FOR DELIVERED PRICES

Japanese Yew (*Taxus Cuspidata*)

For any and every purpose in which evergreens are required some form of the Japanese Yew can be recommended. Perfectly hardy in the coldest parts of New England, and resistant to diseases and insects. Accommodating to an extraordinary degree, withstands shade of full sunshine. Dark green at all seasons of the year. Small wonder this plant has been acclaimed Japan's greatest gift to the gardens of America. This is the semi-spreading type growing about as wide as high.

	Price per 10

2 to 2½ ft.	1.75 ea.
2½ to 3 ft.	2.75 ea.
3 to 4 ft.	3.75 ea.

Hick's Yew (*Taxus Media Hicksi*)

This is a columnar form with branches ascending almost vertically. One of the older horticultural varieties introduced and named for the Hick's Nursery. Although this tree is included in the *Taxus Media* group by some authorities, it is according to Hick's Nursery a horticultural form of *Taxus Cuspidata*. The growing habit varies a great deal with the method of trimming. It may be grown into an extremely narrow cigar shape or allowed to develop into broader specimens. It makes a good tree for narrow hedges.

	Price per 10
6 to 8 in.	\$.30 ea.

We Sell Boxwood Hedges Too

*High or Low, Rough or Smooth, Dwarf or Tree
Good Hedges are scarce but we have them*

Everything about them is just right, including price

The Yew in its several species and shapes can well be used in any place where an evergreen will do will. Nurserymen and landscape planters have really begun to appreciate the Yew for its hardiness and its many uses in the landscape planting.

These Yews have been heavily pruned every year and are dense plants of the finest quality.

Spreading English Yew (*Taxus baccata repandens*)

A low form with long wide-spreading branches and dull, bluish-green narrower and longer leaves, partly falactely curved upward. Hardy in New England

	Price per 10
6 to 8 in	\$.35 ea.
15 to 18 in.	1.25 ea.
1½ to 2 ft.	1.75 ea.
2 to 2½ ft.	2.00 ea.

Dwarf Japanese Yew (*Texus Cuspidata brevifolia nana*)

This is one of the oldest horticultural forms of Japanese Yew, having been widely known and planted for many years. It is almost blackish in color, of extremely slow growth, forming a low irregular and picturesque outline. Old specimens bear a closer resemblance to Boxwood than any other Evergreen. It was formerly known under the name of *Taxus cuspidata brevifolia*, which name was later changed to *Taxus cuspidata nana*. There are at least two distinct forms sold under this nme.

	Price per 10
6 to 8 in.	\$.35 ea.
9 to 12 in.70 ea.
12 to 15 in.	1.10 ea.
15 to 18 in.	1.65 ea.

Upright Japanese Yew (*Taxus cuspitata capitata*)

Seedling form of the native Yew of Japan growing in an upright habit Some trees are single stemmed, others have a tendency to produce many stems. For some uses the single stem is more desirable and tree can be grown in either way with careful attention to early pruning. Generally grown from seed. Although some selected types have been reproduced by other means. There are numerous horticultural variations of this tree listed in this catalog. Like all the Yews, this form is able to survive a dense shade but will also grow in sunny locations.

All of the Japanese Yews have certain characteristics in common. The needles are all quite similar in appearance. They produce their fruit in the form of a fleshy cup-shaped scarlet berry. The male and the female flowers are produced on separate trees. In order to have fruiting specimen the trees must be planted in groups.

	Price per 10

Hybrid Everblooming Tea Roses

Fine, hardy, two-year-old, nursery-grown, everblooming rose bushes. These roses are budded on strong, healthy rootstock to promote vigorous growth. Rootstocks have been grown in the nursery one year before being budded.

AUTUMN. Most extraordinary colored rosebud—burnt orange—on strong stems for cutting. Foliage glossy and very dark green.

BETTY UPRICHARD. (Hybrid Tea.) Deep toned carmine with coppery orange blend; interior mostly delicate salmon-pink. Very choice.

BRIARCLIFF. Handsome flowers of silvery rose-pink.

DAME EDITH HELEN. (Hybrid Tea.) Largest, most perfectly shaped and most perfumed pink Rose. Clear, glowing pink, from the time the bud opens until the petals fall. Blooms abundantly, with long, strong stems. Growth of bush is vigorous and thoroughly hardy. Wins praise and admiration everywhere.

DUCHESS OF LUXEMBOURG. Rich golden yellow.

DUCHESS OF WELLINGTON. Large, well-formed buds, opening to semi-double saffron-yellow flowers, stained with crimson and changing to lighter yellow.

EDITOR McFARLAND. Long pointed pink bud with a glow of amber and a paler edge. Fine for cutting.

E. G. HILL. Great, massive blooms of deep maroon, velvety on inside, very fragrant.

ETOILE DE FRANCE. Well-formed buds that develop into full open flowers of red and soft velvety crimson, shading to vivid cerise.

ETOILE DE HOLLANDE. (Hybrid Tea.) Large, velvety crimson flowers produced in great profusion throughout the summer. Deliciously perfumed. Vigorous, upright grower. Unquestionably a popular and excellent red Rose.

GRUSS AN TEPLITZ. (Hybrid Tea.) Bright scarlet, shading to velvety crimson; fragrant; free flowering.

JOANNA HILL. (Hybrid Tea.) Extremely large, very long-pointed; flowers large, semi-double, full, unusually lasting, moderately fragrant, darker yellow than Sunburst, borne singly on long, strong stems. Beautiful foliage; few thorns. Vigorous grower; profuse bloomer.

J. J. L. MOCK. Silvery rose-white, reverse of petals carmine-pink.

K. A. VICTORIA. Most popular of all white Hybrid Tea Roses. Flowers large and finely formed, borne singly on strong upright stems.

KILLARNEY PINK. Fine satiny pink. Perfectly hardy, robust grower. A constant bloomer.

KILLARNEY WHITE. Same habits and fragrance as Killarney Pink.

LADY ASHTOWN. Very pale solid carmine-pink; yellow base. Blooms are large, globular and well formed.

LOS ANGELES. Flame-pink. Buds long and pointed. Beautiful from the opening of the bud until the last petal drops.

MARGARET McGREDY. One of the most popular Red Roses. Almost always in bloom; a thrifty, vigorous grower.

MEV. G. A. VAN ROSSEM. Brownish yellow flowers, strongly shaded with copper-pink.

MME. CAROLINE TESTOUT. Broad petals of satiny rose, rounded flower, shaded darker at center and lighter edges.

R O S E S

MME. BUTTERFLY. Harmony of bright pink, apricot and gold. Richly perfumed.

MME. EDOUARD HERRIOT. Color coral-red; a free blooming variety; producing fine flowers all summer and until frost.

MISS ROWENA THOM. (Hybrid Tea.) Large buds open to full blooms of perfect form, often measuring over 5 inches in diameter. The color is deep rose-pink with a yellow base to the petals which lights up the whole flower. Vigorous grower, splendid foliage, and blooms freely. Delicious fragrance.

MRS. AARON WARD. Dark yellow, almost orange. A beautiful variety.

MRS. E. P. THOM. Clear, deep canary-yellow.

MRS. PIERRE S. DUPONT. (Hybrid Tea.) This Gold Medal winner has a medium-sized long-pointed bud of a reddish gold, opening to a semi-double, cupped, very lasting fragrant flower of a deep golden yellow. The plant is strong and vigorous.

PINK RADIANCE. (Hybrid Tea.) Extra hardy, vigorous and prolific. Blending of carmine-rose with shades of opal and copper.

PRES. HERBERT HOQVER. Vivid cerise-rose, softly suffused with yellow. Always in bloom.

RED RADIANCE. (Hybrid Tea.) Large, globular flowers of an even, clear red. Constantly in bloom. Very popular.

REV. F. PAGE-ROBERTS. Copper-red buds unfolding to beautiful golden blooms.

ROSLYN. Full golden yellow bloom, deeper in center, with orange splashings on back of petals.

SOUV. DE CLAUDIUS PERNET. (Pernetiana.) Most satisfactory yellow Rose. Strong sunflower-yellow, even deeper toned at center. Large flowers; buds long and pointed. Vigorous growing bush, with brilliant foliage.

SOUV. DE GEORGES PERNET. Brick-red, magnificent blooms.

SUNBURST. Golden yellow with yellow-orange center. A good variety.

SYRACUSE. A new Rose, outstanding in the brilliance of its bright crimson hue.

TALISMAN. A multi-color rose of orange, yellow and rose-red. Fragrant—a gold medal winner.

WILLOWMERE. Brilliant pink flowers suffused with a golden light.
